The item will be heard at a future board meeting, in conjunction with the board's consideration of an order on reconsideration of the Executive Director's approval and partial disapproval of a Temporary Urgency Change Petitions regarding Delta water quality requirements. Based on the extensive written comment record generated by approximately 70 interested parties and the February 18, 2015 Public Workshop during which approximately 75 individuals testified before the State Water Board over the course of 12 hours, an extensive set of information is now available to provide a thorough understanding of the issues raised. The Executive Director of the State Water Board anticipates releasing a Revised Order on or before March 4, 2015, based on this information.
